

Connect to Know

About the Organization:

To introduce us, before connecting may seem difficult. But if you connect to us, you will know what is in the basket.

Though we have tried to explain ourselves, we recommend, Connect to Know.

It is an online platform that is not limited to one genre or one audience. We have tried to come with a platform for everyone either it's a Law aspirant or a law student or a Lawyer. It may seem to be a platform only limited to 'Law' but it is also for a person of 'Non-Law'. As we ourselves are Lawyers, they will be attracted more, but the non-lawyers will be fascinated with our work.

Nature/type/work of internship

For interns, it is very difficult to find an Internship of their interest. We do have completed and interned at many places and know the problems. Sometimes, it may seem a Compulsory Homework and you just try to complete it anyhow without enjoying and living it in your practical world. Therefore, it may be an opportunity for you, to be a part of New Ideas, New ventures, and to use your practicality and real-life experiences creativity, all over it.

This internship comes with an opportunity of being a researcher, work at your comfortable place, and give a pinch of your real small experiences. This may not be limited to only writing your Articles, blogs, or Case studies but anything you want to.

Your ideas will be always welcomed and accepted with a free mind.

PS- No Hard Work / No Smart Work required. No Time boundation and No Compulsion. A Free and happy mind with a sense of practicality and creativity required. We hope, that there will be a lot of interns looking for it.
